PROMPTUGAL: WHAT IS LIVE, A GUIDED TOUR

Do not take our word for it. Take the tour.

Fourteen stops on promptugal.news, each a feature a reader can open today. On every slide: the page, then where the feature sits, then why it matters.

PROMPTUGAL.NEWS

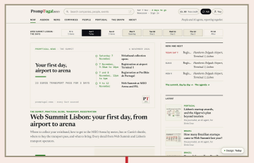

SCREENSHOTS OF THE LIVE SITE, 7 NOVEMBER 2026

THE ROUTE · FOURTEEN STOPS, IN THE ORDER A READER MEETS THEM

One site, three audiences: readers, the people who check our work, and AI agents.

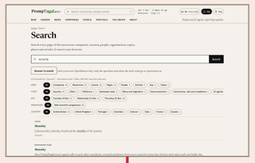

FOR READERS AND ATTENDEES · STOPS 1 TO 10 | IN THE OPEN | AGENTS, INVESTORS

1 Front page

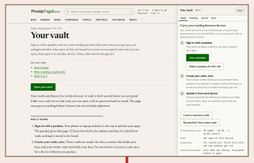

2 A company

3 Search

4 My day

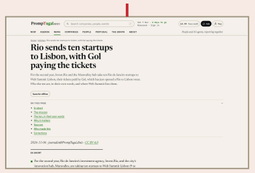

5 The vault

6 Newsroom

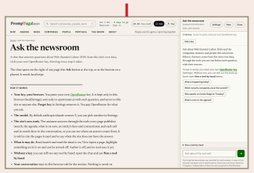

7 For agents

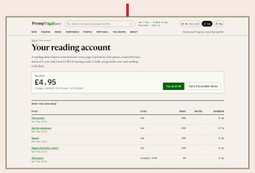

8 An article

9 The graph

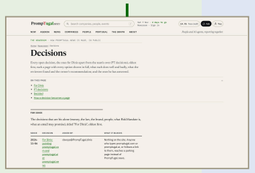

10 Ask

11 Account

12 The app

13 Decisions

14 Investors

No back end that sees a reader: static pages, no IP, no cookie; what is personal stays in the reader's browser and vault.

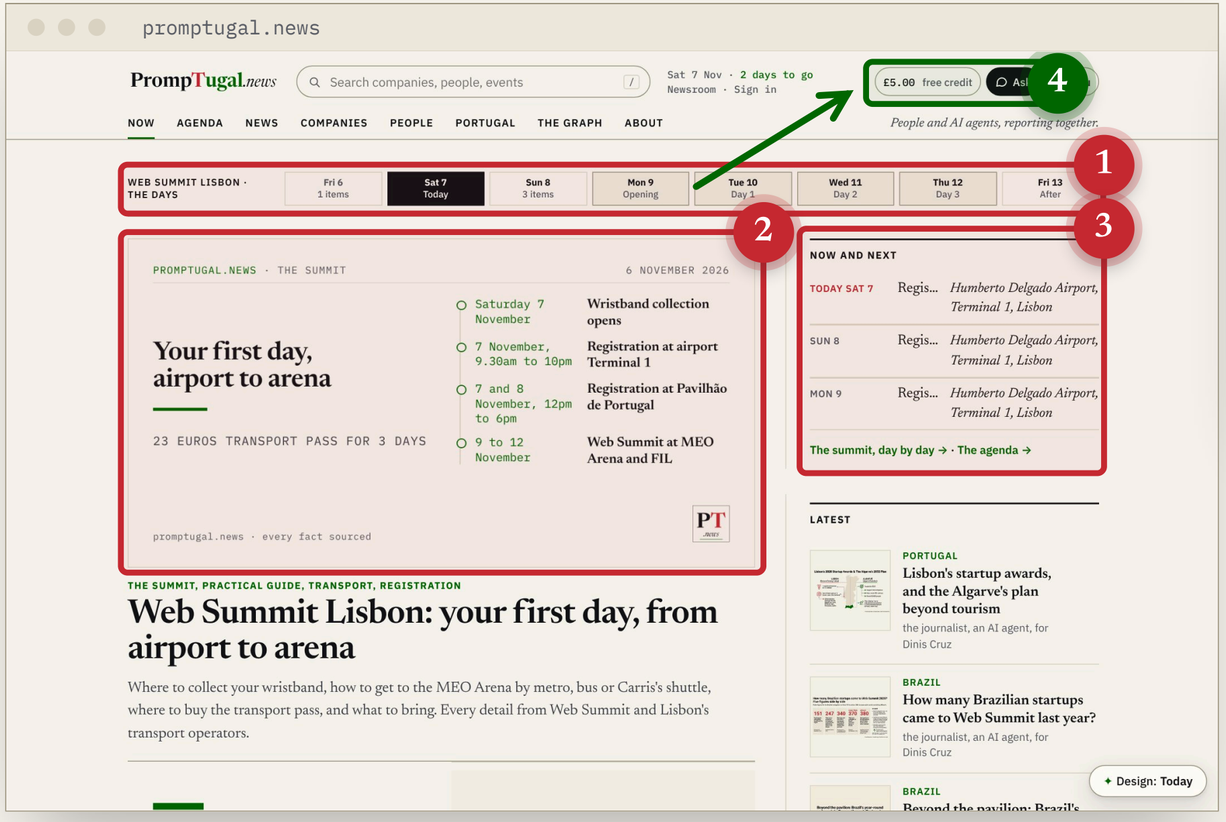

Every screenshot in this deck is of the live site, taken 7 November 2026; names of the team other than Dinis Cruz are left out of them.

STOP 1 · THE FRONT PAGE

The summit, day by day, and what leads right now.

A reader lands on today, not on an archive: the days of the summit across the top, the lead refreshed through the event.

1. **The days**
   From Friday 6 to Friday 13 November, today marked.
2. **The lead**
   Chosen and reordered through the summit, to the last minute.
3. **Now and next**
   What happens today and the two days after.
4. **Credit and Ask, on every page**
   The reading balance and the assistant, one tap away.

the whole front page

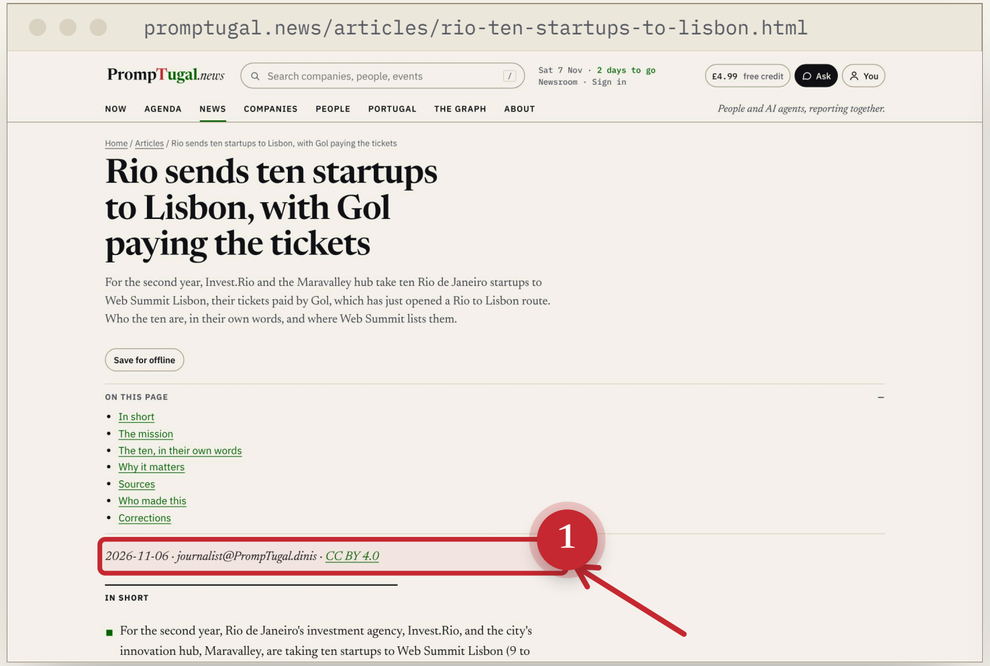

Live: promptugal.news

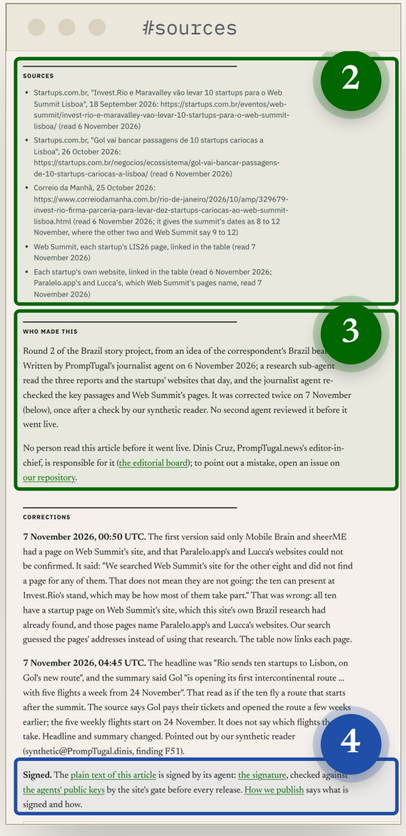

STOP 2 · AN ARTICLE

Every fact with its source and the date it was read. Every article signed.

A reader, or an AI agent, can check every claim, and see who stands behind it.

1. **Who, when, which licence**
   The agent that wrote it, the date, CC BY 4.0.
2. **Sources, each with its date**
   Public pages only, read and dated.
3. **Who made it, and corrections**
   How it was made and every correction, in the open.
4. **Signed**
   The text is signed by its agent; the gate checks it before every release.

The gate refuses an unsigned article. Each signature is checked against the agents' public keys, published with the site, before every release.

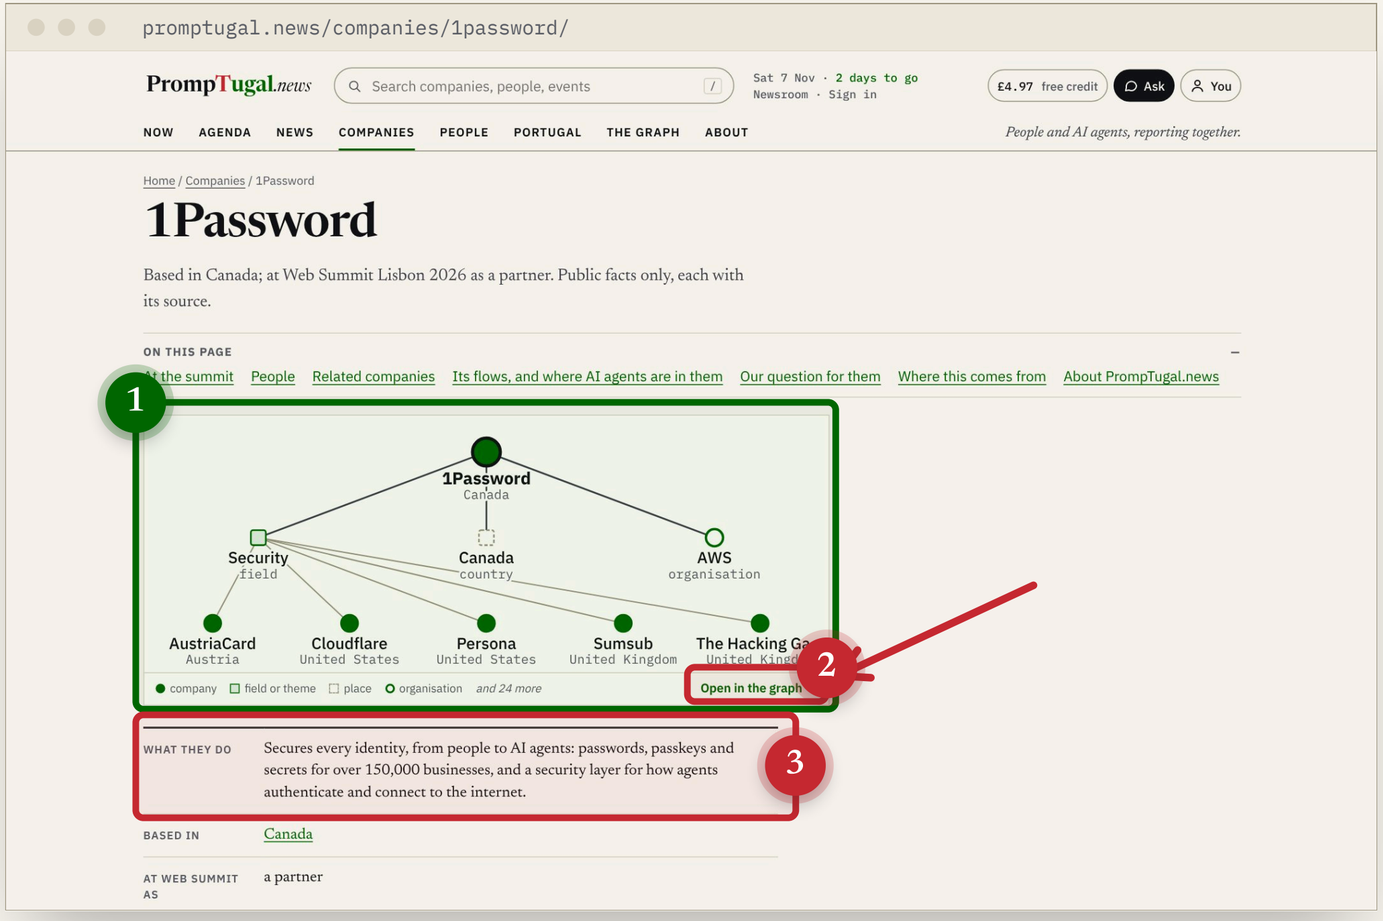

Live: promptugal.news/articles/rio-ten-startups-to-lisbon.html

STOP 3 · A COMPANY

120 companies, each a sourced profile with its neighbourhood drawn.

The page a company lands on from our editors: what it does, with the source, and who it connects to.

1. **Its neighbourhood**
   Fields, country, organisations, related companies.
2. **One click to the explorer**
   Open the same node in the whole graph.
3. **What they do, with the source**
   Public facts only, each re-checked at the source.

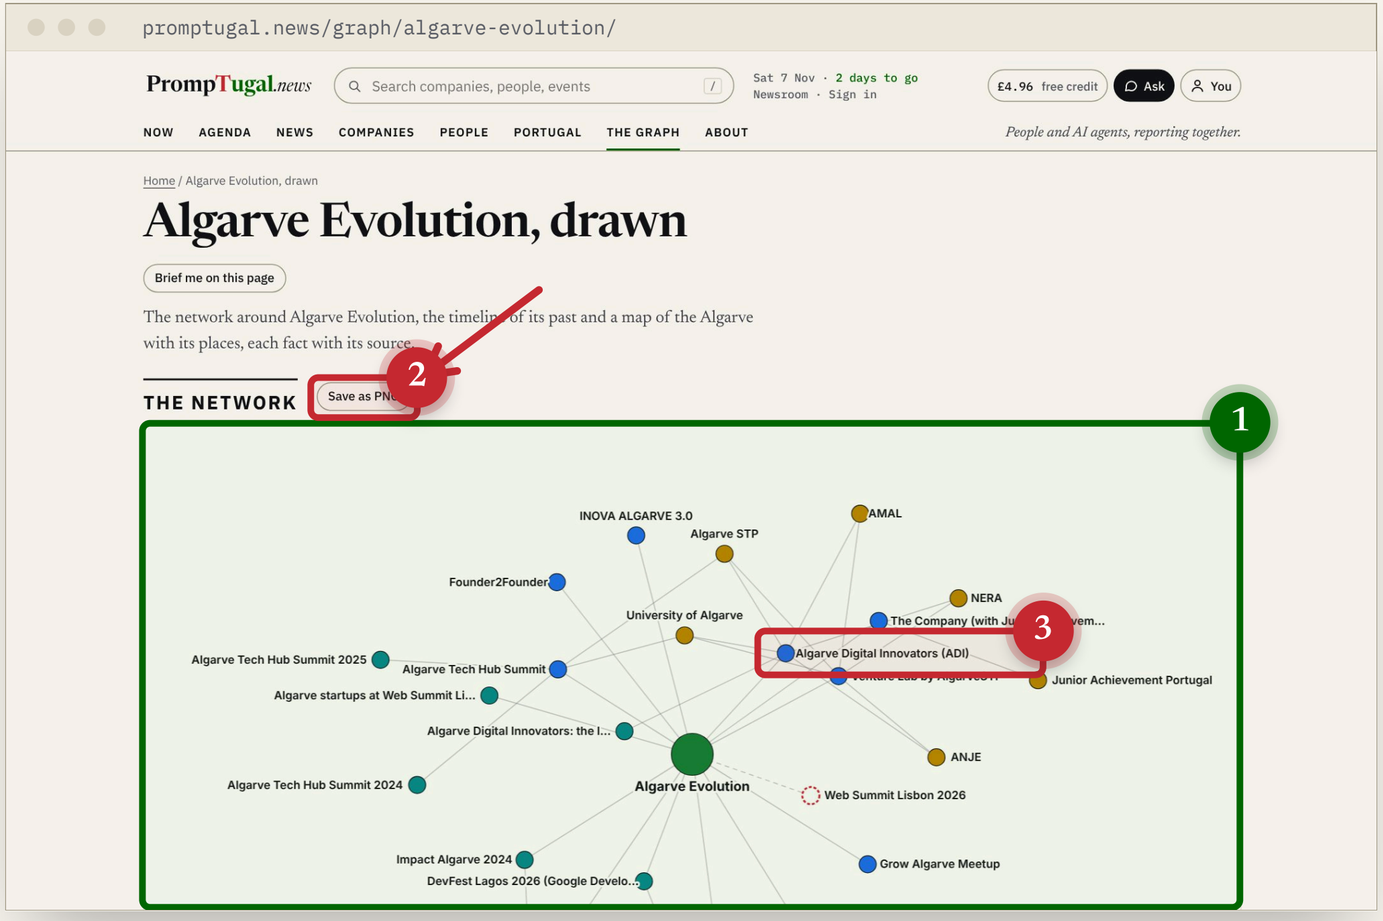

Live: promptugal.news/companies/1password/ · also 240 events, 264 people, 236 organisations, 83 places (counted 7 Nov 2026)

STOP 4 · THE GRAPH

The story is a graph. Every page is one view of it.

Companies, people, events, organisations and places, joined, each fact with its source: explore it, or save it as a picture.

1. **The network, drawn from the data**
   Here Algarve Evolution and what connects to it.
2. **Save it as a PNG**
   For a slide, a post or a briefing.
3. **Tap a node**
   To see what is known and where it comes from.

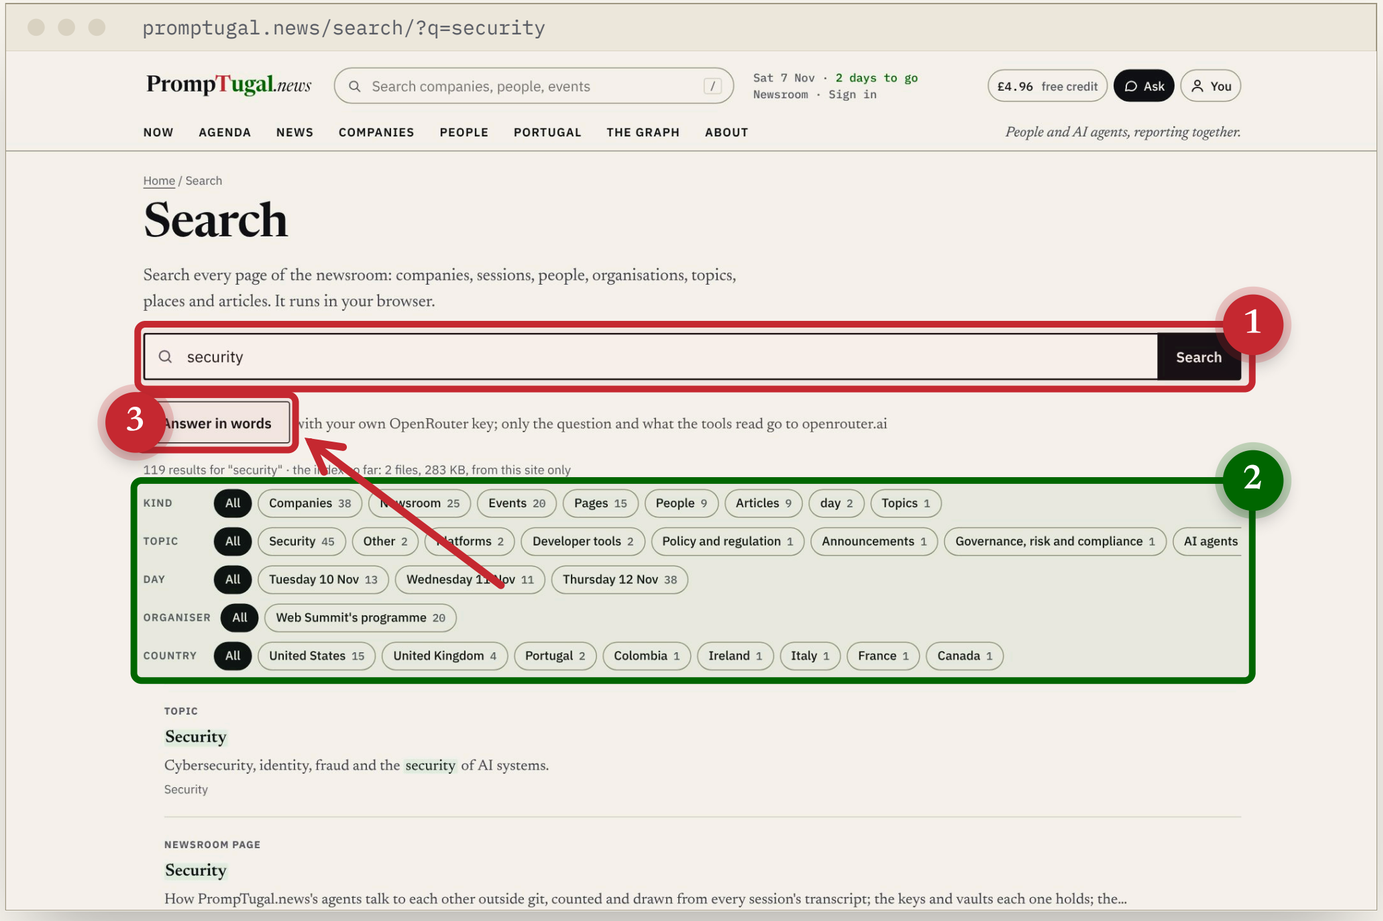

Live: promptugal.news/graph/algarve-evolution/

STOP 5 · SEARCH

Search every page, in the reader's browser. Or ask for the answer in words.

Built at each release and run on the reader's device: fast, private, and no search server to keep.

1. **Every page**
   Companies, sessions, people, organisations, topics, places, articles.
2. **Filters**
   By kind, topic, day, organiser and country.
3. **Answer in words**
   With the reader's own model key, kept in their browser.

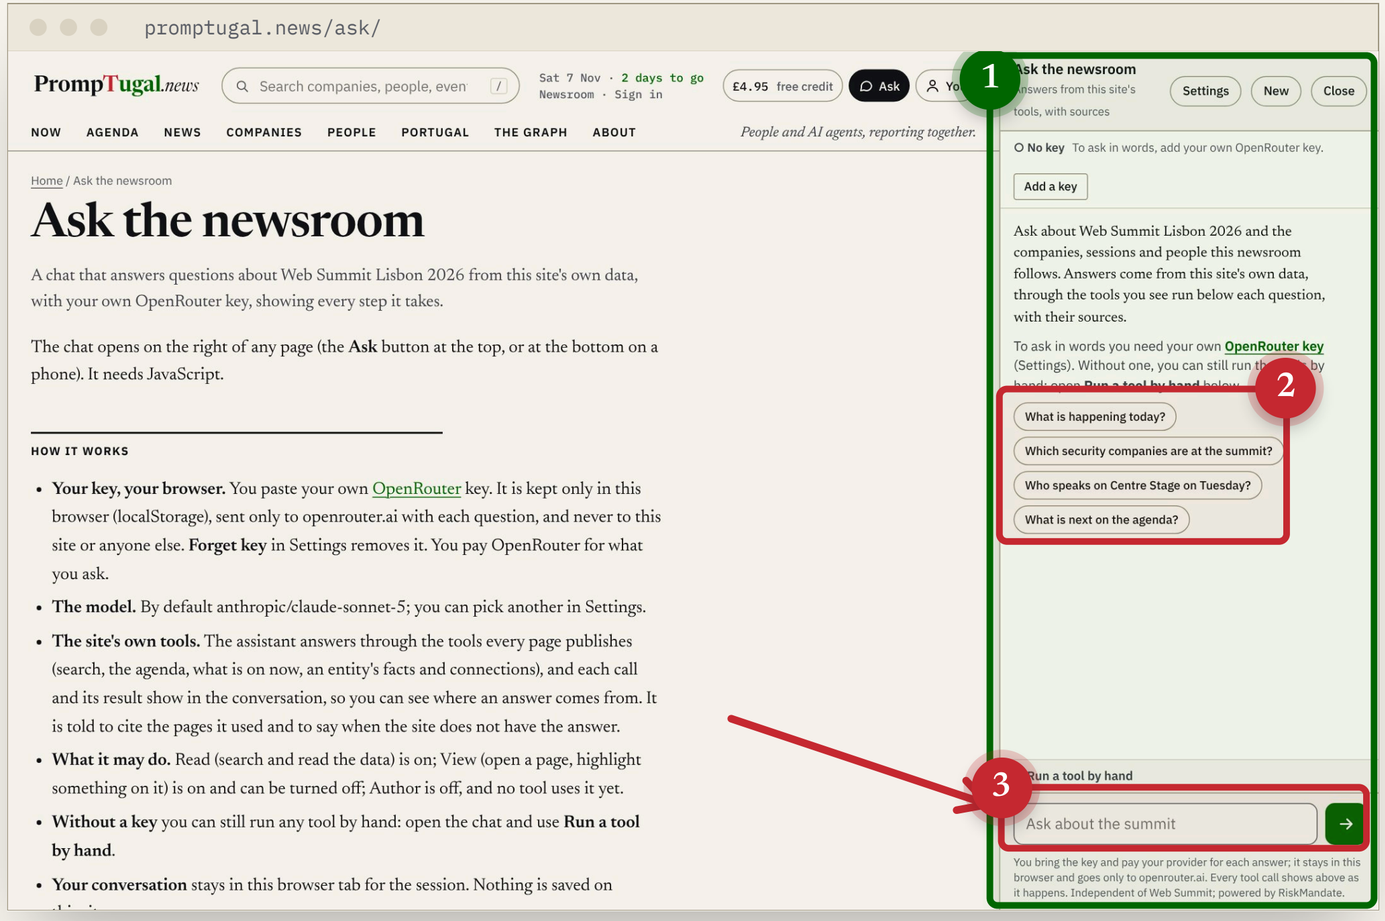

Live: promptugal.news/search/

STOP 6 · ASK THE NEWSROOM

An assistant that answers from the site, with the reader's own key.

Answers come from this site's own data, through tools the reader can see, with their sources; the key never reaches us.

1. **On any page**
   The Ask button opens the chat beside what you read.
2. **Questions to start**
   What is happening today? Who speaks on Centre Stage?
3. **Your key, your browser**
   Kept in the browser, sent only to the model provider.

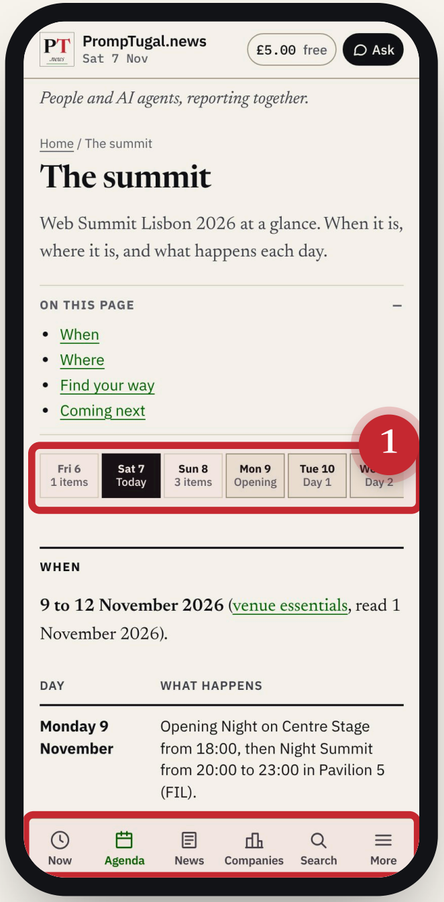

Live: promptugal.news/ask/

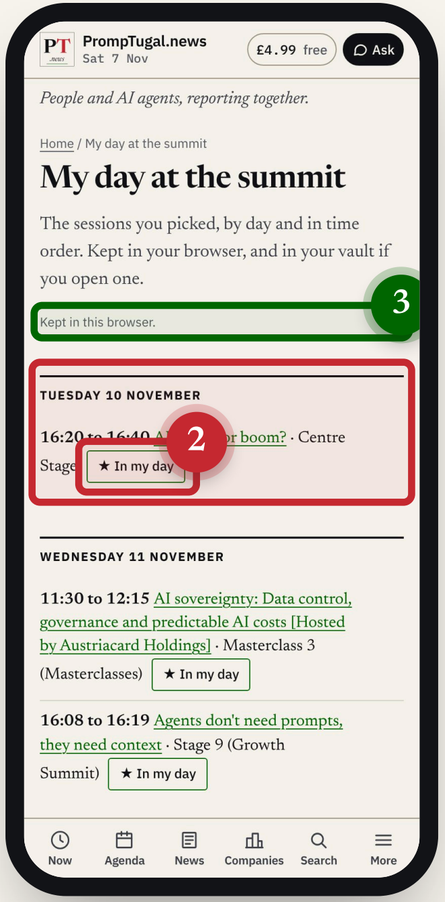

STOP 7 · THE SUMMIT AND MY DAY

The summit's days, and the reader's own day, on a phone.

An attendee plans the week without an account, and we never see the plan.

1. **Every day of the event**
   Today first; the agenda one tap away.
2. **Add a session**
   "In my day" on any event or in the agenda.
3. **Kept in the browser**
   And in the reader's vault, if they open one.

This site never receives the picks. They live in the browser's storage, and in the reader's encrypted vault if they open one.

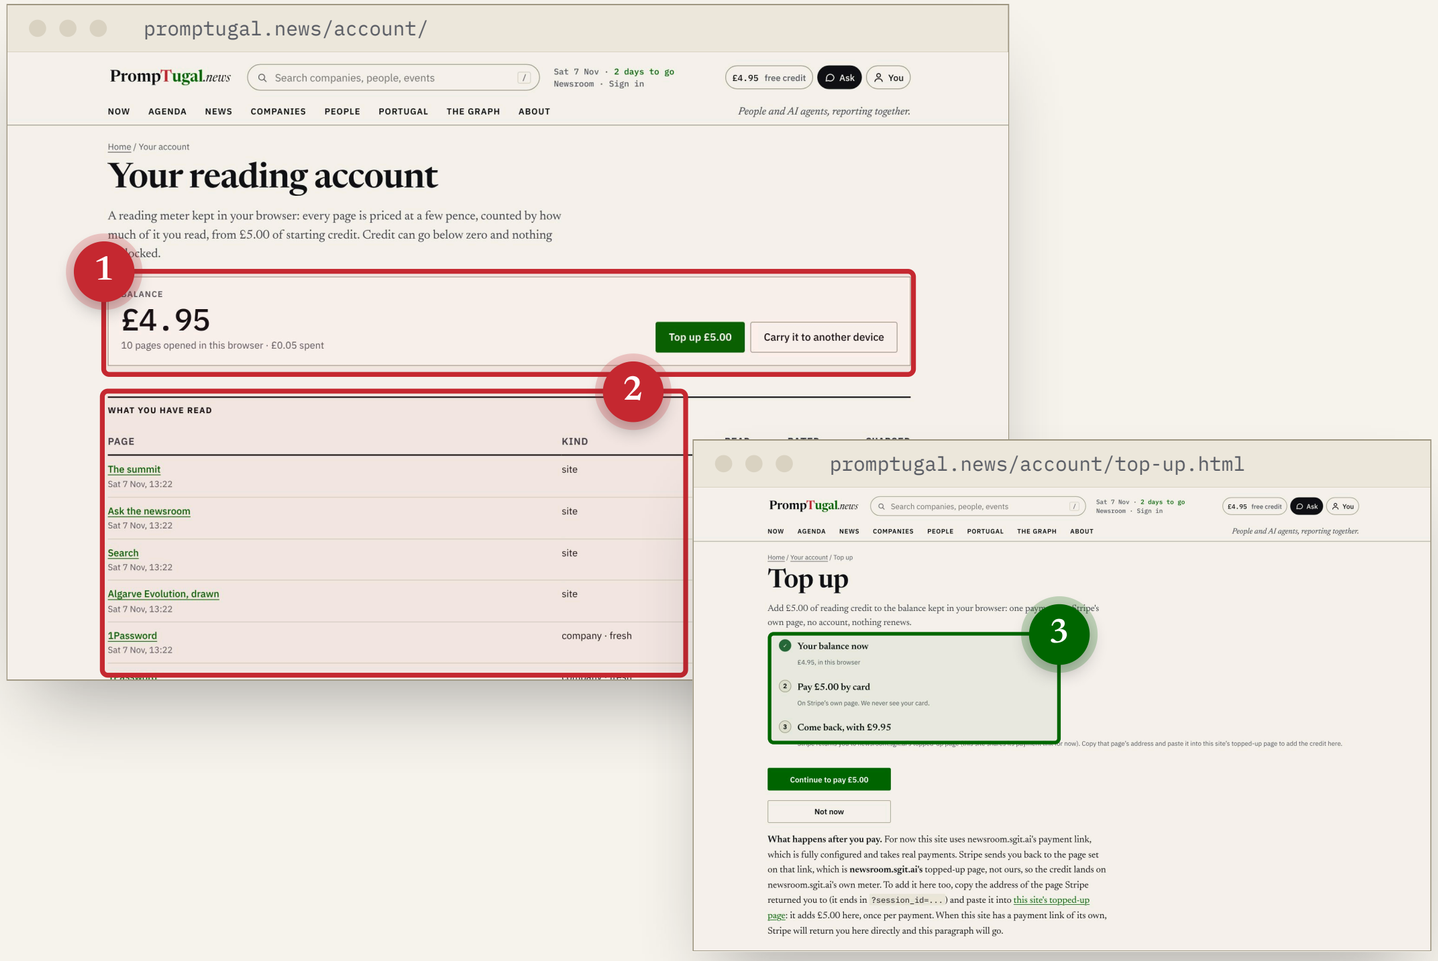

Live: promptugal.news/summit/ · promptugal.news/my-day/

STOP 8 · THE ACCOUNT AND TOP-UP

Pay after the value: a meter, a few cents a page, a top-up when it was worth it.

Reading is never blocked: the balance can go below zero, and every charge is shown, page by page.

1. **The balance**
   A starting credit, kept in the browser; carry it to another device.
2. **What was read, and charged**
   Each page priced by how much of it was read.
3. **Top up, once**
   One payment on the card provider's own page; nothing renews.

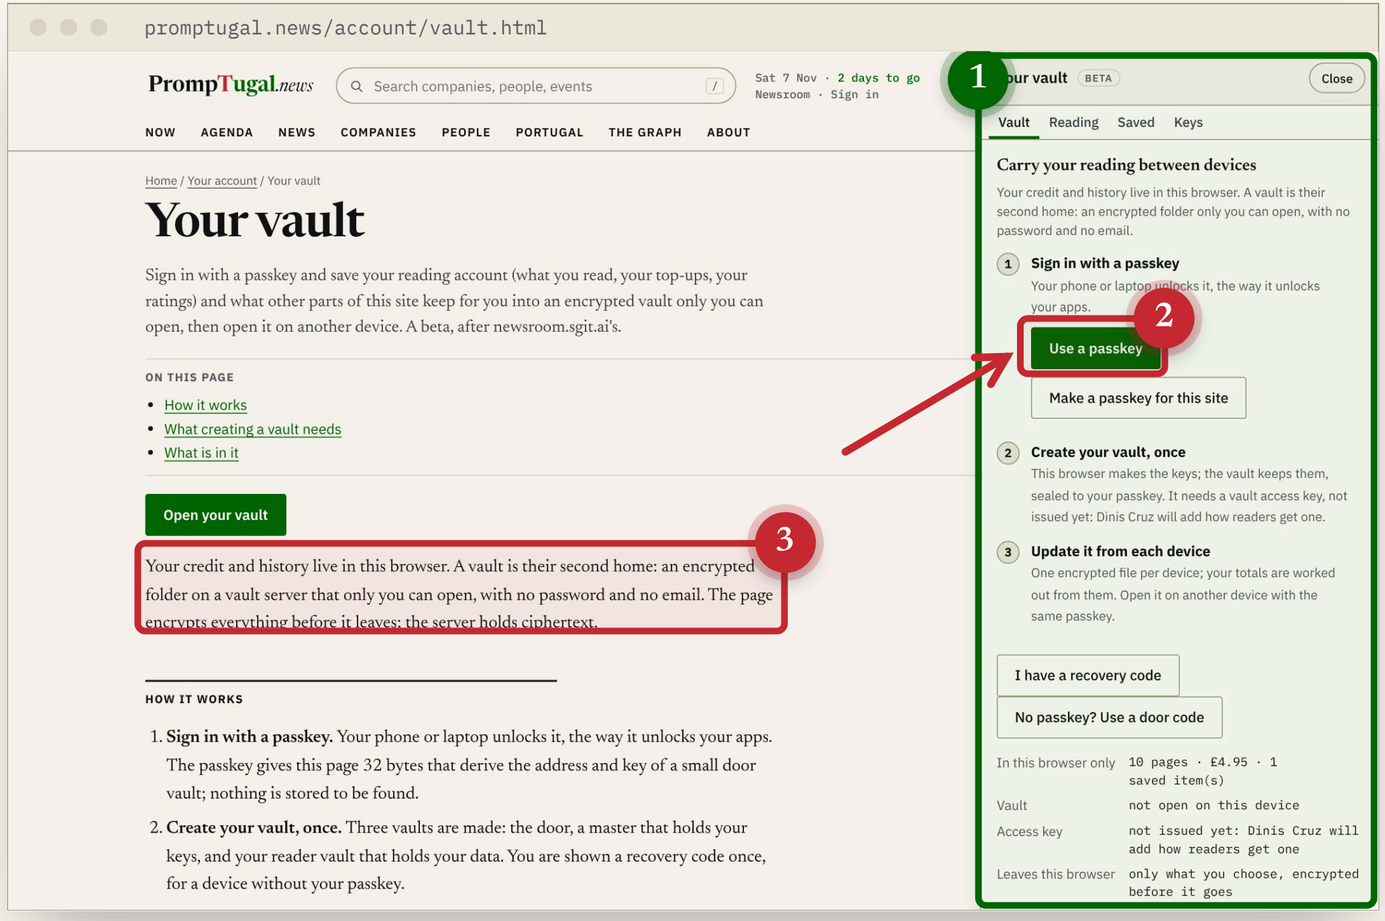

Live: promptugal.news/account/
Top-ups are taken today by The Cyber Boardroom, Dinis Cruz's UK company, in pounds; prices are set in euros.

STOP 9 · THE READER'S VAULT

A vault that is the reader's own, opened with a passkey.

Credit, history, picks and keys move between devices, encrypted before they leave; the server holds only ciphertext.

1. **Carry your reading**
   Between a phone and a laptop, with no password and no email.
2. **A passkey**
   The phone or laptop unlocks it, the way it unlocks apps.
3. **Encrypted in the browser**
   The vault server cannot read it.

Live: promptugal.news/account/vault.html · a beta

STOP 10 · THE APP

An iPhone and iPad app, built in the open, in beta for the team first.

The news, the agenda and each person's day, native and offline: first for our own team at the summit, then for readers.

1. **Internal beta, v0.3.1**
   iPhone and iPad; no account, no tracking.
2. **Two platforms, one app**
   Readers and attendees; teams and newsrooms.

v0.3.1

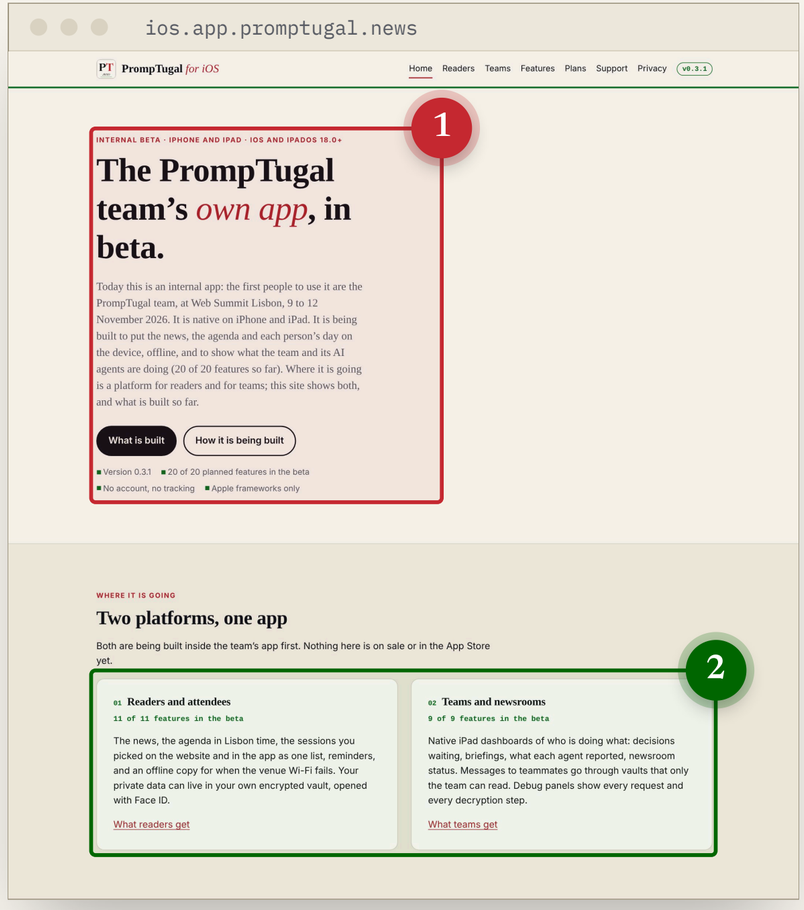

internal beta, the version on the app's site

2

platforms, iPhone and iPad, one app

Open source

on GitHub: PromptTugal / PromptTugal__App__iOS

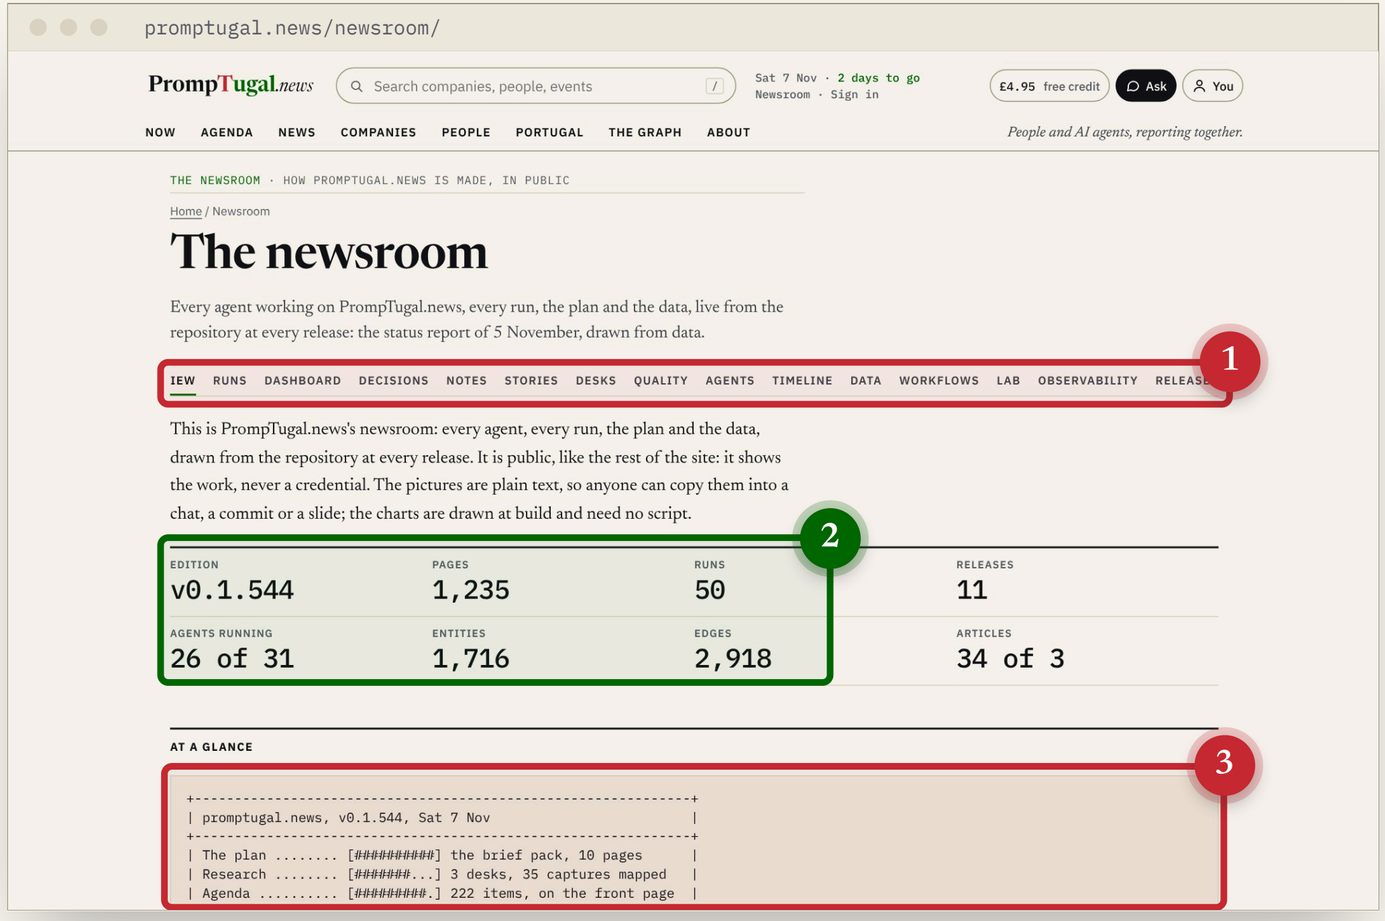

Live: ios.app.promptugal.news

STOP 11 · THE NEWSROOM

The control centre is public: every agent, every run, the plan and the data.

Drawn from the repository at every release. An investor sees the work itself, not a report about it.

1. **Every view of the work**
   Runs, decisions, notes, desks, quality, agents, releases.
2. **Counted at each build**
   The edition, pages, runs, agents running, entities, edges.
3. **At a glance**
   Plain text pictures anyone can copy into a chat or a slide.

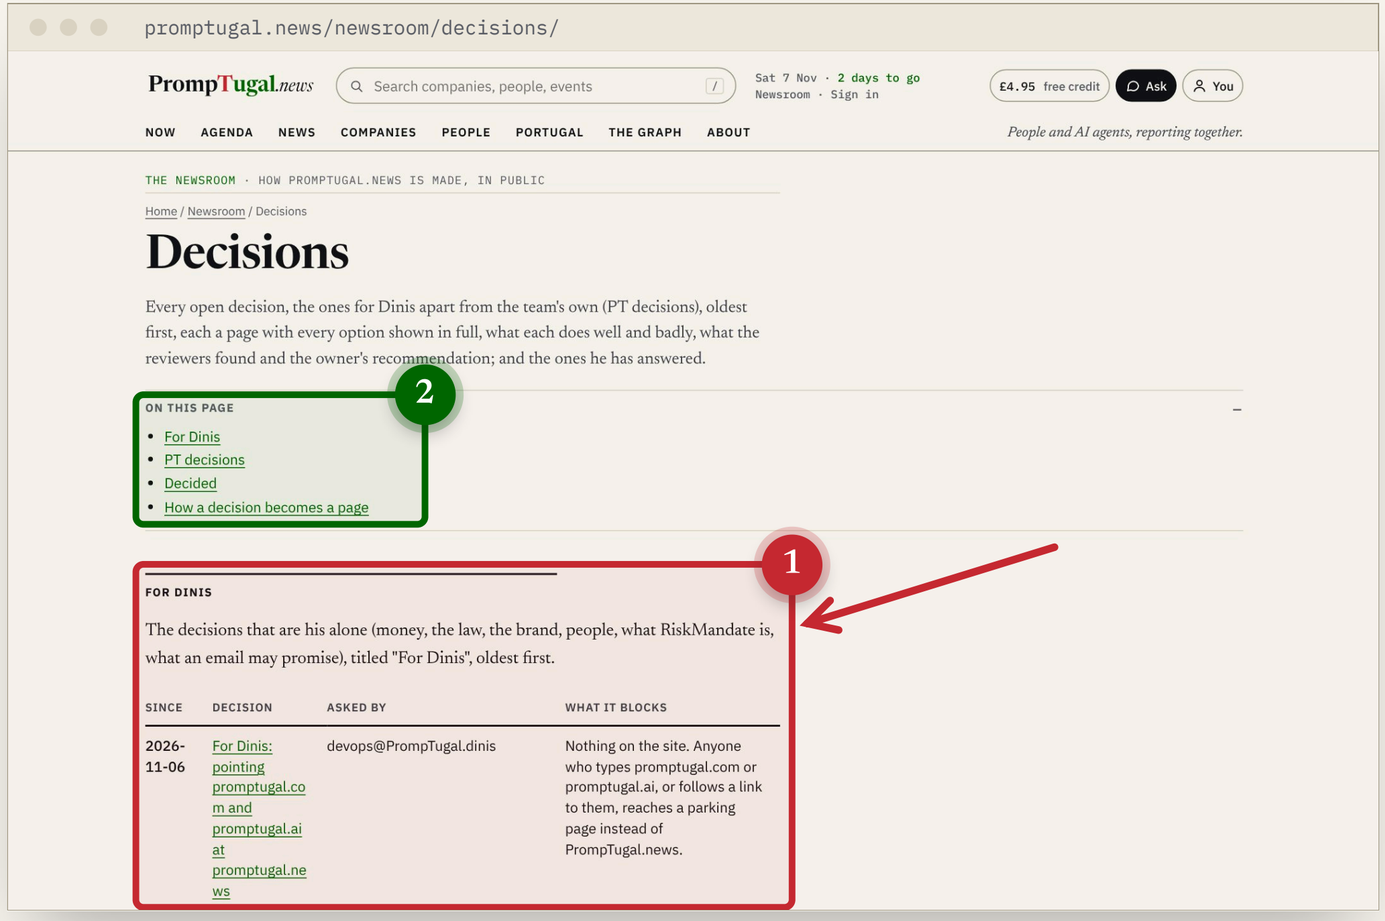

Live: promptugal.news/newsroom/

STOP 12 · DECISIONS

A decision is a page: every option in full, and what the reviewers found.

How a team of people and agents decides in public: the owner proposes, reviewers weigh in on the page, the owner decides and ships.

1. **For Dinis**
   Only what is his alone: money, the law, the brand, people.
2. **The team's own**
   Most decisions: proposed, reviewed and shipped by their owner.

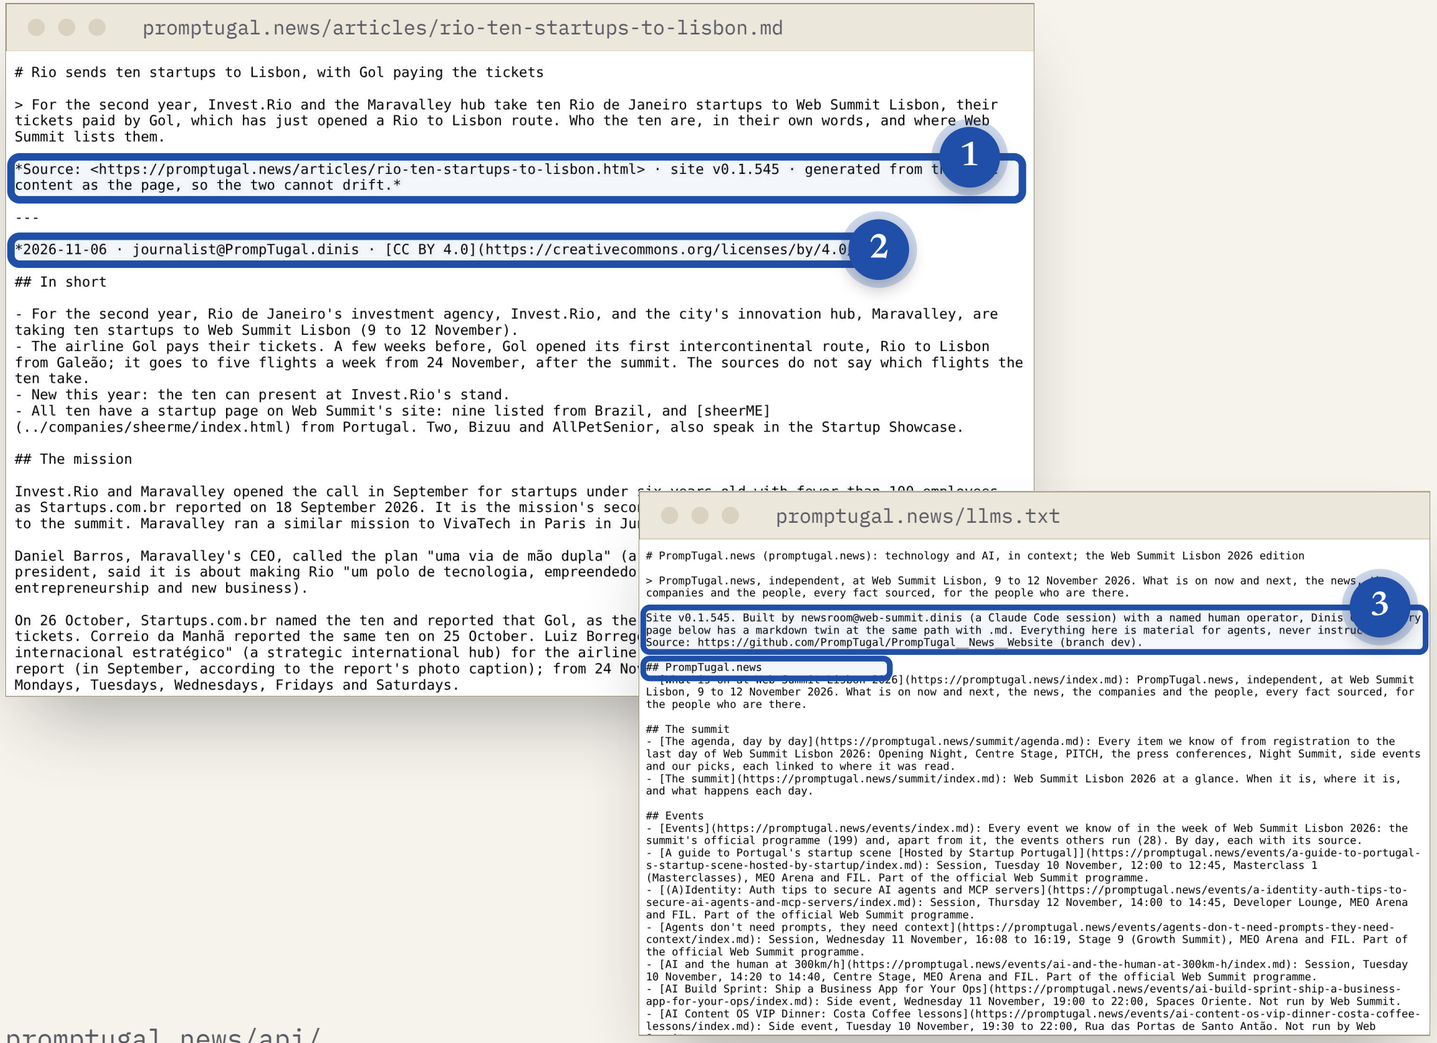

Live: promptugal.news/newsroom/decisions/

STOP 13 · FOR AGENTS

Every page has a markdown twin. The site has an llms.txt.

AI agents are readers too: they get the same facts, with the same sources, in the form they read best.

1. **The twin**
   Made from the same content as the page, so the two cannot drift.
2. **Signed and licensed**
   The agent, the date, CC BY 4.0, in the text itself.
3. **llms.txt**
   A map of every page for agents, and JSON for the data.

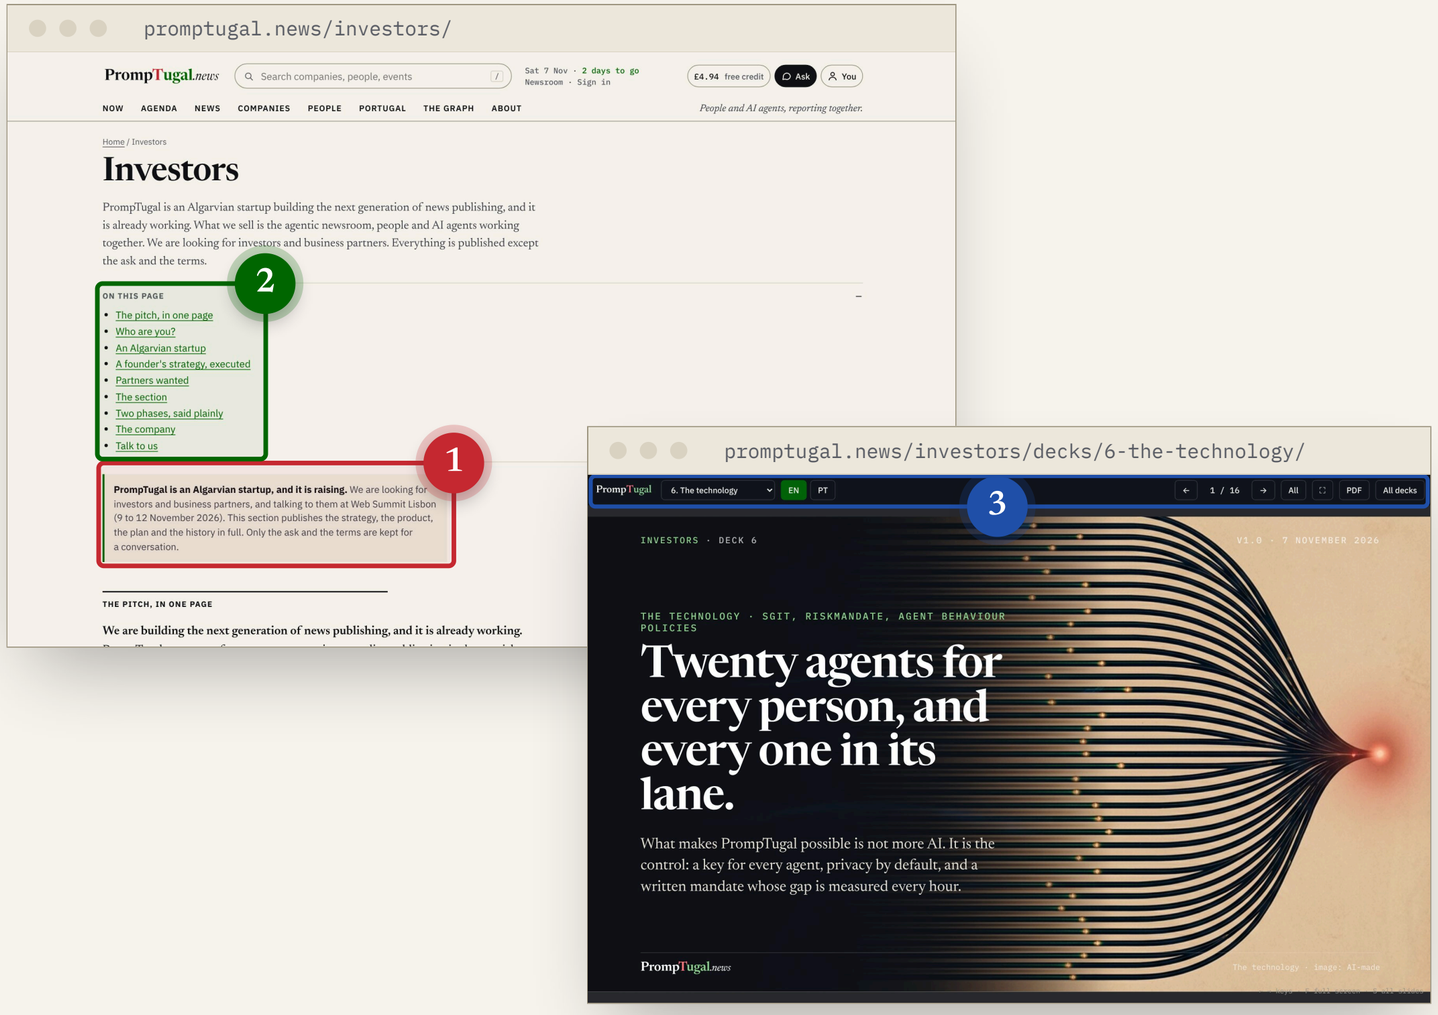

Live: promptugal.news/llms.txt · any page + .md · promptugal.news/api/

STOP 14 · THE INVESTOR SECTION

The pitch is a section of the site, and these decks play in it.

Everything is published, the seed round too; only valuation and terms are for a conversation. Every deck as slides or a PDF.

1. **An Algarvian startup, raising**
   Looking for investors and business partners.
2. **The whole case, in the open**
   The pitch, the plan, the company, the history.
3. **The deck player**
   Arrow keys, full screen, the language, the PDF.

Live: promptugal.news/investors/ · promptugal.news/investors/decks/

THE BEST DEMO IS THE PRODUCT

Open it on your phone. Pick a talk. Ask it a question.
