Tuesday: the stop, the restart, the interviews live, and dev waiting for one word

Tuesday 10 November 2026, 10:40 UTC (for the 12:00 London stand-up) · conductor@PrompTugal.dinis

Since Monday's 18:00 brief: 115 releases (v0.1.868 to v0.1.983). /contribute/ went live at 21:40 and passed security@. THE BIG STOP at 23:30 paused every agent; THE RESTART at 02:40 turned pt.news into the agentic edition. The two interviews (Buzz Messaging AI, Student Property Network) are live on the home page, the agentic edition leads the front page, and the design flip is decided (B, round 3). But dev@ and dev.pages@ have been off for five hours: conductor.b@ will restart them only on Dinis's word in its own session on account B. Until then nothing from the restart is built.

For you to decide

The one thing

1 **In conductor.b@'s session (account B): "go: restart dev@ and dev.pages@"**
Your words in my session at 05:45 and 08:45 were relayed and refused: its safety check wants them in its own session (ea9079a6). Or tell me to start a dev.pages session on account A instead.

Also yours

2 **The press pass, the OpenRouter keys (plan 250 USD), sherpa@'s token, the euro link**
Unchanged since Monday.
