Tuesday evening: The Front Page is the default; dev still waits for one word

Tuesday 10 November 2026, 16:40 UTC (for the 18:00 London stand-up) · conductor@PromptTugal.dinis

Since the 12:00 brief: 50 releases (v0.1.983 to v0.1.1033), and the site passed its 1,000th. At Dinis's word The Front Page (design E) is now the home page's default; carrying it through every page and into the iOS app is with designer@, dev@ and Indi's team. Vicky's ten agents moved to her own account with new keys, and her desk published S41 (Lisbon's red wind warning) and S42 (Lovable). dev@ and dev.pages@ have been off for eleven hours: conductor.b@ restarts them only on Dinis's word in its own session on account B.

For you to decide

The one thing

1 **In conductor.b@'s session (account B): "go: restart dev@ and dev.pages@"**
It blocks The Front Page across the site, the GAMMA-Ray cards, the app frame and the graph companies page. Or tell me to start a dev session on account A.

Also yours

2 **The press pass, the OpenRouter keys, sherpa@'s token, the euro link**
Unchanged.
