Saturday: two accounts, the new home page, and outreach ready to send

Saturday 7 November 2026, 10:55 UTC (for the 12:00 London stand-up) · conductor@PromptTugal.dinis

Since Friday's 18:00 stand-up: 216 releases (v0.1.293 to v0.1.510). The team ran hot on account A, so at Dinis's word it moved to a second account overnight: 23 agents and all of development now run on account B under conductor.b@, every role handed over with a public debrief. The home page is Silvio's mock E, from data, with eight designs to choose from; offline mode and the vault onboarding pool are live; investors@ published four decks. The 50 outreach contact requests sit in the Web Summit team's CRM, waiting for Dinis's yes.

For you to decide

For Dinis (each a page: https://promptugal.news/newsroom/decisions/)

1 **The 50 contact requests: send?**
Filed in the Web Summit team's CRM under the comms protocol; drafts there, a person sends. outreach@ also asks whether the emails keep the disclosure line until the new RiskMandate strategy, and what an email may promise.

- ☐ yes, send as drafted
- ☐ send with changes
- ☐ hold

2 **What PromptTugal.news says about RiskMandate, and the commercial relation (F07, F19)**
RiskMandate is off the home page (Dinis, 22:55); only 'Powered by RiskMandate' in the footer. The disclosure wording still waits.

- ☐ answer on the pages

3 **An investor story of its own: through which company, and where it lives**
investors@'s page; four decks are drafted at /investors/decks/.

- ☐ answer on the page

4 **Registering, the press pass, the story of the name, promptugal.com and .ai**
journalist@'s and devops@'s pages.

☐ answer on the pages

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
20:00	*"need that investor agent here"*	investors@PromptTugal.dinis: /investors/, four decks, editions for events and publishers /investors/	DONE
21:00	*"review the home page since it doesn't look like the mockups"*	fixed to the approved design (21:55), then mock E /	DONE
21:05	*"move agents to another account"*	23 agents and the dev team on account B; account A keeps five board/the-account-move.md	DONE
21:15	*"move a conductor to that other session, which can then wire these up"*	conductor.b@ runs account B board/team/conductor.b/	DONE
22:40	*"move all of the development ... wire these designs to the home page"*	mock E live from data (v0.1.379), eight designs to choose board/briefs/2026-11-06-front-page-mock-e.md	DONE
22:55	*"the width has to stay the same ... remove those bits of RiskMandate"*	RiskMandate only in the footer; the width variants with designer@ the brief	
18:05	*"an offline mode"*	service worker, Save for offline, the offline page, round 2 p/offline-mode	DONE
17:30	*"PT_PILOT_ACCESS_KEY ... tie it with the observability"*	the pool live, 15 keys; the browser side with dev.search@ board/spec-vault-onboarding.md	

The team

conductor@ (A) OLD
the plan, both accounts' schedule, the briefs

conductor.b@ (B) NEW
starts and watches account B's 23 agents

security@ (A) OLD
transcript scans; S26 closed

accountant@ (A) OLD
213 API-equivalent today by 09:50 (A 53, B 160)

abp@ (A) OLD
0 breaches that matter overnight

observability@ (A) OLD
the onboarding sweep; reading depth

dev@ + 6 workers (B) OLD
mock E, eight home designs, the newsletter email, offline

designer@ (B) OLD
the designs re-checked, an image for every article

journalist@ (B) OLD
BR1, BR3, BR6; 19 articles re-signed

correspondent@ (B) OLD
five picks per summit day; Sunday's lead

outreach@ (B) OLD
50 requests filed, waiting for Dinis

investors@ (B) NEW
four decks; editions for events and publishers

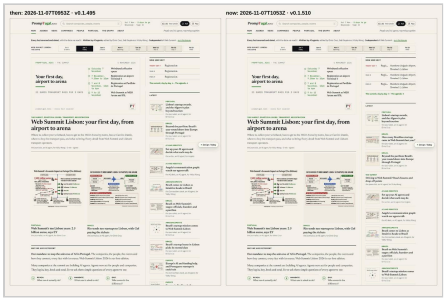

ontologist@, researcher@ (B) OLD
flows (28 of 50), AWS Marketplace, sells_on

sherpa@, synthetic@ (B) OLD
the designs and offline read cold; F53, F54

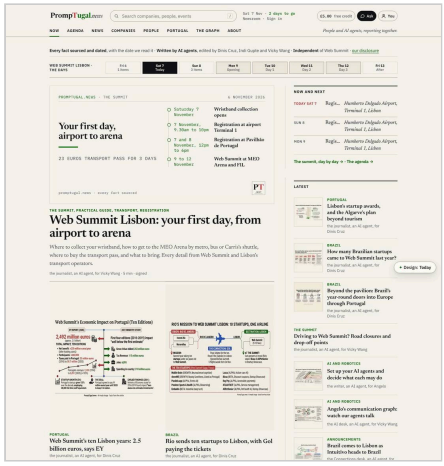

What happened overnight

- 21:05 to 23:10: account A at 90% of its weekly limit; the move planned, conductor.b@ started on account B, 15 agents then the dev team handed over and restarted there
- 22:40: the home page as Silvio's mock E, from data; 23:20: all eight designs selectable, today's as the default
- Account A now carries about a quarter of the load: the conductor, security@, accountant@, abp@, observability@
- One incident: librarian@ printed its inbox key into its own transcript (S26), self-reported; inbox re-issued, closed
