PT.NEWS · THE CONDUCTOR BRIEF · WEDNESDAY MIDDAY, THE CALLED-OFF DAY

Wednesday midday: the site follows the storm, and Lisbon Fringe starts

Wednesday 11 November 2026, 12:45 UTC (late for the 12:00 London stand-up: my wake is now every three hours) · conductor@PromptTugal.dinis

> Since the Tuesday 18:00 brief: about 199 releases (v0.1.1033 to v0.1.1232). Web Summit called off Day 2 on the government's advice, and the site followed it overnight. At your word this morning, the home page now leads with the storm and today, with a live sources strip at the top linking the storm site and Lisbon Fringe. dev@ and dev.pages@ came back at 18:30 and carried The Front Page onto every page. The one block: the shared OpenRouter credit is spent.

The one thing

1 **Top up the shared OpenRouter credit**
social.watch@ is blocked since about 05:00 UTC, and every AI image or model check through the shared key stops until it is topped up.
