THE INVESTMENT, AS A COMPANY

Equity in a company that is already running, at the explorer's stage.

What you invest in, what the money is for, who holds a stake, and how the company changes as it grows. For the investor who has seen deck 1 and asks: how would this work?

The investment · image: AI-made

THE INVESTMENT, IN THREE PARTS

You buy equity in the company. The money runs the company. The technology is already being built.

01 · WHAT YOU BUY

Equity in My Feeds

The Portuguese company that publishes PrompTugal.news and is expected to take the PrompTugal name.

02 · WHAT IT PAYS FOR

The operations

Preparing the company for the next level: commercialisation, services and editorial, with very technical journalists.

03 · WHAT IS ALREADY THERE

The platform and a team

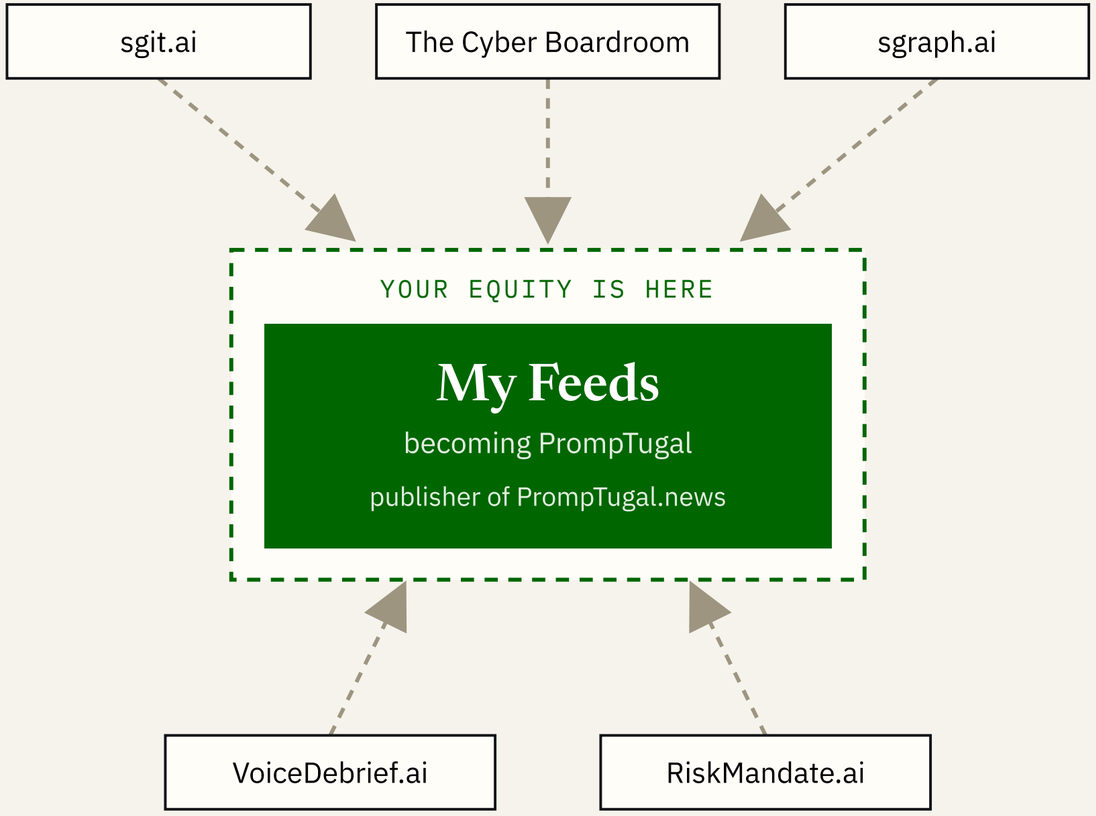

A newsroom that runs every hour, and a team already onboarded. With funds, we accelerate.

ONE COMPANY, MANY OPEN-SOURCE NEIGHBOURS

Your equity is in My Feeds, the company becoming PrompTugal.

- **My Feeds** (MYFEEDS AI, UNIPESSOAL, LDA): incorporated in Portugal on 22 October 2025, seat in Loulé, the Algarve.
- **Dinis Cruz** is its founder and CTO, today its sole director and shareholder.
- **The neighbours** are his other open-source startups: their code flows in under Apache-2.0. Investing here is investing in My Feeds only.

Company details as cited from the business registers by web-summit.sgit.ai/investors/company/; the strategy: open-source.sgit.ai.

Dashed lines: open-source technology shared under Apache-2.0

WHAT THE COMPANY DOES WITH THE INVESTMENT

Six kinds of work, one goal: a company that pays for itself.

THE GOAL **Be profitable**

Aim, in Dinis Cruz's words: profitable in the next couple of months. Web Summit Lisbon is the first test.

01
Services
The team and the platform, deployed for a customer's project.

02
More events
The same platform for the next event: data before, during, after.

03
More companies
Coverage and customers beyond one summit and one country.

04
Customer support
People who answer, for readers and for paying customers.

05
Customised versions
A person's, a team's or a delegation's own edition.

06
Selling open source
Dual licensing: our code under a company's own terms, maintained by us.

Dinis Cruz, 7 November 2026. The revenue streams in full: deck 1 and promptugal.news/investors/business-plan.

THE OPERATIONAL LEVEL

The money goes into running the company: the people who sell, serve and write.

EQUAL BANDS: CATEGORIES, NOT PROPORTIONS

The core technology is developed by Dinis Cruz, full time, across his companies. **What the investment adds is the company around it:** the people who sell, serve and write.

THE TEAM IS IN PLACE; ONBOARDING WAS FAST

We are not raising to start. We are raising to go faster.

3 days

from the first commit (4 Nov 2026) to a full publication

426

releases, each built, checked and deployed automatically

~25

named agent roles running PromptTugal, under one human operator

7

people at the summit: the front-end team

Today

A mix of Gen Z and Gen X, working unpaid in a win-win: they learn a lot, fast. Nobody has been asked or promised anything yet.

→

Once there is investment

Everybody paid, everybody with a stake, the gaps filled with senior people. "Once we have funds, we can just accelerate."

Counted from the public repository, 7 November 2026; agent roles from CLAUDE.md; the team and the quote: Dinis Cruz, 7 November 2026.

WHO DOES WHAT, AND WHAT IS STILL MISSING

A technical founder, and a business partner to run the company.

WANTED: A CEO

Someone from the news industry who wants to build the news company the industry never let them build.

- **Runs all operations,** so the founder stays on the technology.
- **Has run companies;** ideally very senior in the news industry.
- **Comes from the people already involved:** "if somebody is not interested enough to be involved right now, are they only going to flip when they have equity? I don't like that."

Dinis Cruz, 7 November 2026.

INVESTORS, THE FOUNDER, THE TEAM

Three kinds of stake. The team's comes alive as the company succeeds.

WHO HOLDS EQUITY · CIRCLES NOT TO SCALE

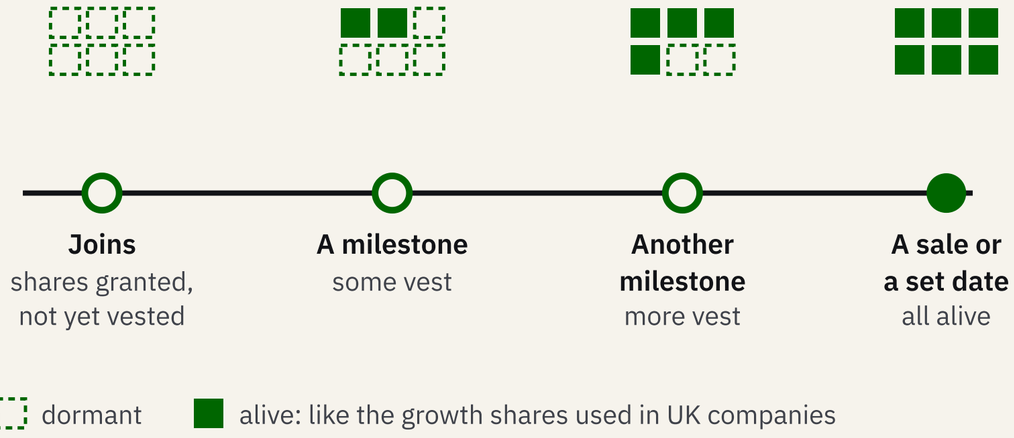

buy equity
in the company;
their money runs it

Dinis Cruz
founder and CTO;
today sole shareholder

growth shares
core team and
strategic hires

THE TEAM'S GROWTH SHARES · HOW THEY COME ALIVE

No percentages here: the split between investors, the founder and the team is to be decided.

WHAT INVESTMENT CHANGES FOR THE TEAM

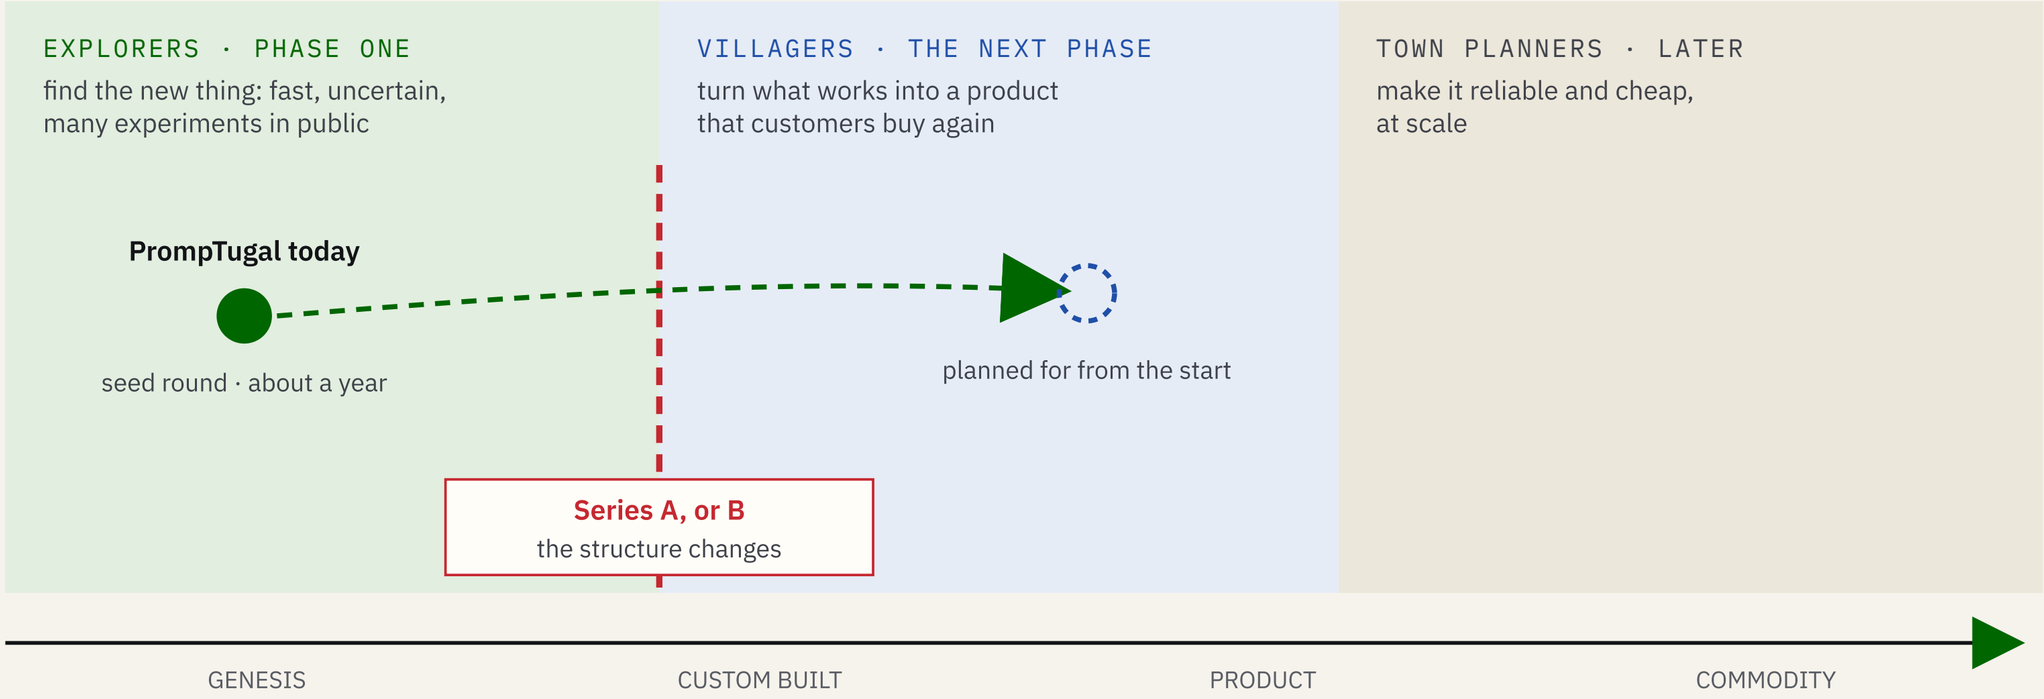

"When investment comes, everybody will have equity. Everybody has a stake in the game, everybody will be paid, and then we accelerate."

DINIS CRUZ · 7 NOVEMBER 2026

Until then, nobody on the team has been asked or promised anything: **"only when somebody puts money on the table can you have a more serious conversation."**

EXPLORERS, VILLAGERS, TOWN PLANNERS

Phase one is the explorers'. The company is built to change shape after it.

Explorers (pioneers), villagers (settlers) and town planners: Simon Wardley's model of how a company's people and methods change as what it makes evolves. Phases: Dinis Cruz, 7 Nov 2026.

ABOUT A YEAR, FUNDED BY A SEED ROUND, TO SERIES A

What the explorers do with the year.

9 TO 12 NOV 2026

Validate

Web Summit Lisbon: do people use it, come back and pay? We publish what happens either way.

THE SEED ROUND

Pay and hire

The team paid, with a stake; a CEO and very technical journalists brought in with equity.

THE NEXT MONTHS

Profitable

Sell what people ask for: customisation first, then the next events.

THROUGH THE YEAR

Widen

More events, more companies, services, customer support, customised versions, licences.

SERIES A

Change shape

From explorers to villagers: a new structure, planned for from the start.

PLANNED FOR FROM THE START

Growth shares that vest on milestones, so the team's stake follows the company's progress through each phase.

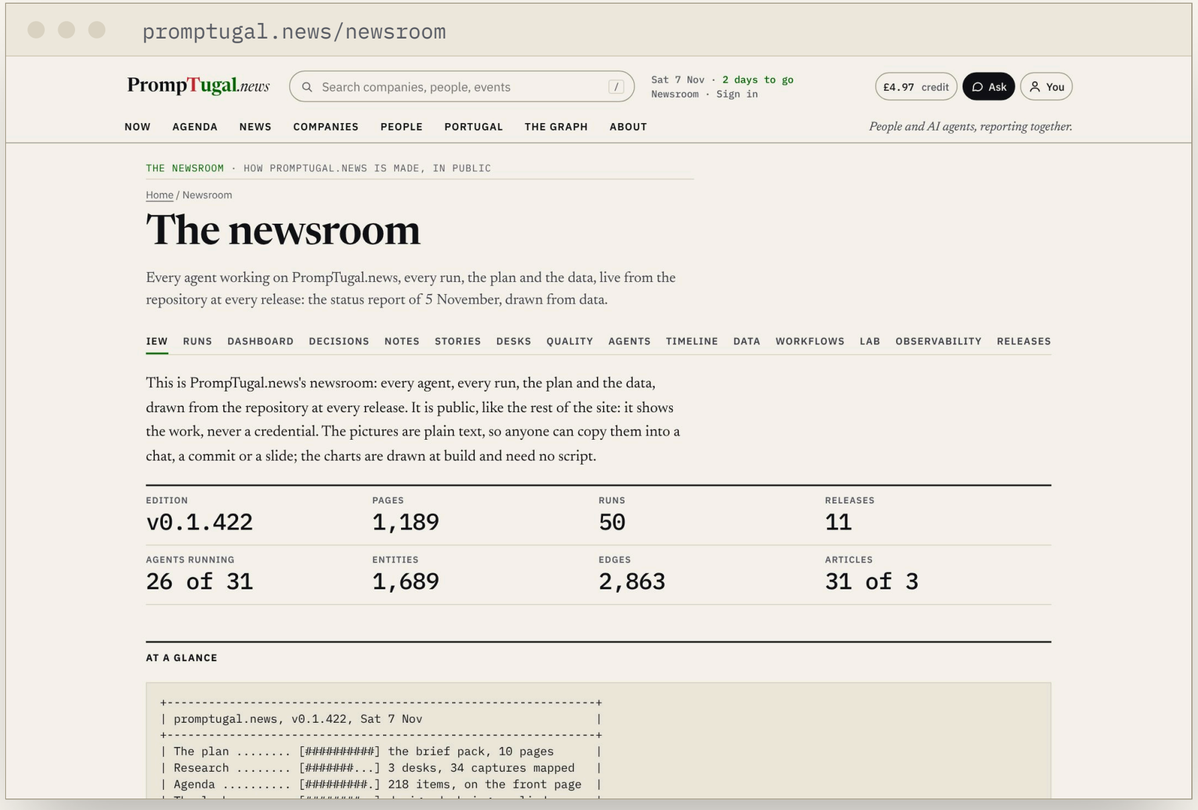

KEPT THROUGH EVERY PHASE

Open source by strategy: the code, the data and the record stay public, whoever joins and whatever the round.

A STAKE, AND A SEAT ON THE JOURNEY

An open-source company where you can see everything.

- **Equity in an open-source company:** code Apache-2.0, text and data CC BY 4.0, and dual licensing for companies that want their own terms.
- **Everything visible:** the code, the data, the plan, the decisions and every agent's run, public from the first commit.
- **A seat on the journey:** you see each release as it happens, many times a day.

The newsroom: every agent, every run, the plan and the data, drawn from the repository at each release.

WHAT IS MISSING HERE, AND WHY

The numbers are for a conversation. We do not have them to give honestly yet.

THE SIZE

of the seed round: in conversation.

THE VALUATION

in conversation, with the people who put money on the table.

THE SPLIT

between investors, the founder and the team: to be decided.

THE TERMS

in conversation; when they exist, they are published.

Try it, read everything (or have your agent read it), then talk: Dinis Cruz, at Web Summit Lisbon, 9 to 12 November 2026. All of it at **promptugal.news/investors**.
